

## **FALCK RENEWABLES SIGNS A 10-YEAR CORPORATE PPA FOR THE BRATTMYRLIDEN WIND FARM IN SWEDEN**

**MILAN, Italy, July 22, 2020** – Falck Renewables S.p.A. announces the signing of a Corporate Virtual Power Purchase Agreement (VPPA) between its subsidiary Brattmyrliden Vind AB – owning a wind farm under construction in Sweden – and Ball Corporation, the global aluminum packaging provider.

The contract, whose duration is 10 years, will provide for the coverage of around 70% of the electricity produced by the wind farm. The VPPA signed today will address approximately 39% of Ball's electricity load for its beverage packaging plants in Europe, excluding Russia, from 2021.

In 2019, Ball was one of the top 10 corporate buyers of renewable energy in the U.S. and has committed to address 100% of its electricity use in its European beverage packaging plants with clean power.

The Brattmyrliden wind farm (74.1 MW), which is expected to start commercial operations in the last quarter of 2020, is located in the municipality of Örnköldsvik, Sweden. When in operation, the wind farm is expected to generate up to 263.5 GWh of electricity yearly, that is equivalent to the amount of energy necessary to supply around 52,700 homes<sup>1</sup>.

*"We are delighted for this agreement with Ball and glad to help a major corporation, that shares our commitment for decarbonization, to meet their sustainable goals through our green energy. This Corporate PPA represents also an important milestone for Falck Renewables' growth in the Nordics",* commented Toni Volpe, CEO of Falck Renewables.

Ron Lewis, President, Ball Beverage Packaging EMEA, said: *"This power purchase agreement with Falck Renewables underlines our ongoing commitment to a low-carbon future, helping us both to achieve our recently approved Science Based Targets on climate change and to meet the significant sustainability commitments of our customers."*
