

Falck Renewables at WWEC 2022 in Rimini (Italy)

Milan, Italy, 22 June 2022 – The Falck Renewables Group will attend the World Wind Energy Conference WWEC 2022 at Palacongressi in Rimini (Italy) from 28 to 30 June, with five of their representatives speaking about storage, floating offshore wind, and community engagement.

The conference, organized by the World Wind Energy Association (WWEA), in collaboration with ANEV (Associazione Nazionale Energia del Vento), the Italian organization for wind energy, brings together Italian and international industry experts, policy, organizations, academia and civil society. This year's theme will be collaborating for a renewable future in peace.

The Falck Renewables Group's participation kicks off on 28 June, with Frank Wong and Chris Sexton, from engineering and construction taking part as trainers in the "Wind Offshore" course, organized by AIESiL nazionale in collaboration with ANEV. The training which has to be signed up to in advance, will focus on different technologies for offshore wind foundations.

Also on 28 June, Antonio Zingales, Corporate Development and Innovation Director of SAET, a Falck Renewables' company, will speak on smart storage as a key factor in the energy transition, along with other international experts on storage systems from 2 to 3:30 pm in Sala Castello 2.

On 29 June from 11:30 am in Sala Arco, Simona Gambini, Global Head of Communication and Stakeholder Engagement, will speak on community engagement in renewable projects, from the perspective of the Group's experience in Italy and abroad, focusing on the Falck Renewables' approach of sharing value with local communities.

On 30 June, the last day of the conference, Ksenia Balanda, director of Falck Renewables and BlueFloat Energy's floating offshore wind projects in Italy, will talk about the role of the local supply chain in the development of floating offshore wind in Sala Castello 1, from 11:30 am.

WWEC 2022 is supported by "Key Energy - The Renewable Energy Expo" to be held in November in Rimini which the Falck Renewables Group will attend as "Energy Transition Ambassador," a prestigious role with which Key Energy intends to enhance the key players in the sector.

The participation of Falck Renewables' experts, first at WWEC 2022 and then at Key Energy, will be an opportunity to share the wide range of expertise developed over the years by the Group, an international pure play in the renewable energy sector, which operates along the whole energy chain.
