

QHSE POLICY

Falck Renewables is a global company in the renewables energy sector that develops, designs, builds and manages power plants from wind, solar, waste-to-energy, and biomass technology. The company operates as well in the energy services' space.

For a long-term success, at Falck Renewables we believe in creating at the same time, business value and value for local communities, while preserving the environment. This in all the places where we operate.

Investing in renewable energy is, for us, a crucial way to de-carbonize our planet: a commitment that is in the best interests of our customers, our employees, our contractors, our shareholders, the future generations, and all the communities in which we live and work.

We are focused on the ability of continuously improve the quality of the services and products we deliver. We put strong emphasis on ensuring human health, operational safety, environmental protection, high quality standards, and local quality of life.

Our Company firmly believes that a sound QHSE performance is key to ensuring a sustainable business and shall, thus, be considered an integral part of our business decision-making process. Our goal is to be both sustainable and among the best players in the renewable energy business.

For this reason, we are strongly committed to:

- Observe and comply with all QHSE statutory requirements within our area of operations;
- Mitigate the consequences of all types of incidents/accidents having potential harmful effect on personnel, assets and/or the environment, considering the adoption of BATs (Best Available Techniques), where applicable;
- Minimize our impact on the environment through pollution prevention, reduction of natural resource consumption and emissions, and the reduction/recycling of waste, under a Life Cycle Perspective;
- Develop and maintain an appropriate QHSE Management System;
- Apply our technical skills to all QHSE aspects in the design and engineering of our services and products;
- Conduct QHSE reviews and audits to identify shortcomings within the organisation and ensure the compliance with local, international and corporate standards and regulations;
- Develop and implement a Risk Assessment-based approach in conducting business operations;
- Establish and preserve good relations with local communities based on a constructive mutual dialogue with regulators, community representatives, local authorities, as well as other stakeholders about QHSE and security matters of common interest;
- Establish and develop actions for a continuous participation and consultation of workers, as a key factor for a safer work environment;
- Provide training and contribute to develop a QHSE mind-set to raise awareness in every single person at our Company, from top management involvement to worldwide personnel daily activities;
- Continuously improve our performance in all areas of Quality, Health, Safety and Environment throughout the Group, also by internally sharing our best practices.
